About ZTA-Trans align

Advantages

ZTA Trans-align is a new clear aligning method using a personalized ZTA clear aligner made by specialized clear material. The ZTA Consulting Group with more than 10 years of experience, has developed diagnostic and treatment plans for orthodontic patients and has developed a step-by-step aligning model through 3D printers and software bringing highly affective orthodontic appliances as a return.

ZTA Trans-align are widely used because they can be customized individually; differentiated from general clear aligner devices. Aesthetics are also considered, so there is a high degree of preference and less pain with less irritation
