

RegentsX is pleased to provide General English and Business English for Adult learners.

You might need to improve your English for education – to support your study on a Bachelor degree programme which requires academic English.

Or you may be a professional, working in a business or corporate environment. Perhaps you work in sales and buying, or import and export, and you and your clients regularly communicate in English.

RegentsX can help you improve your English whatever your study or work situation might be. We can design a programme for you which focuses on how to manage meetings, and how to improve your negotiation skills. You can practise these scenarios by role-playing with your online tutor.

We can help you with writing skills, such as how to write clear and concise emails, and how to write formal letters and reports. This tuition will have less face-to-face but more support from our tutor checking your writing and giving you detailed feedback.

We design the programme that matches your situation and meets your needs.

RegentsX offers tuition for adults in 10, 20, 30, 40 and 50 hours' packages.

Please contact us to arrange an online video call with our Programme Director, who will discuss options with you.
